## Comments

1. Start with a square, white face up. Make a *fish-base*.
2. Pull down the back flap.
3. Precrease the top at angle bisector. Valley fold the bottom at perpendicular.
4. Valley fold down at angle bisector.
5. Repeat steps 3 to 5 on the other side.
6. This is how the precreases should look like.
7. Raise and open the front flap using existing creases.
8. Rabbit ear the front flap down. Pay attention to indicated mountain and valley folds.
9. Valley fold up. The center flap will go to the left.
10. Valley fold down.
11. Squash fold the white flap which appeared in the process.
12. Petal fold the white flap.
13. Raise up the back flap.
14. Valley fold one layer to the left.
15. Valley fold down. You will have to release some trapped paper.
16. Squash fold one layer.
17. Petal fold to the left.
18. Valley fold two white flaps to the left.
19. Repeat steps 16 to 18 on the right.
20. Valley fold one white flap to the right.
21. Valley fold one coloured flap on each side, at perpendicular. This will form the arms.
22. Fold and unfold so that corners meet in the middle. Note where the creases intercept the arms.
23. Valley fold down at the top of the white flap.
24. Valley fold up. The crease meets the indicated points at step 23.
25. Turn over.

26. Spread squash the center flap.
27. Wrap around one layer (this is like removing a closed sink).
28. Valley fold both sides toward the center, using creases made at step 23.
29. Swivel on both sides.
30. Tuck the front flap inside the pocket behind, on both sides.
31. Tuck both side corners behind the triangular assembly in the center.
32. Mountain fold the top of the triangle inside the model. This should lock the sides of the model.
33. Precrease where indicated. Turn over.
34. Valley fold down. Precrease upward ( $1/2$ ).
35. Precrease upward ( $1/4$ ).
36. Unfold back to step 36.
37. Wrap around the top of the triangle at existing crease.
38. Valley fold on both sides.
39. Valley fold down using existing crease.
40. Valley fold up (see next step for positioning).
41. Precrease at perpendicular.
42. Fold the model in half (mountain fold), add a reverse fold using creases made at step 43.
43. Inside reverse fold the feet. Do not hesitate to make big feet, so that the model can stand. Shape the arms.
44. Round both legs, rotate the feet to the sides. Round the whole body.
45. More shaping is needed so that the penguin looks cute. The penguin is completed.
